IMPORTANT CONSIDERATIONS

SINKHOLES, SINKING STREAMS & CAVES

SILVICULTURE BMP #4

Description:
Protect sinkholes, sinking streams, caves and other depressions in karst topography from disturbance or runoff.

AWQA Minimum Requirements:

1. Runoff from roads, trails and landings shall not drain into **sinkholes, sinking streams, or caves**. (Note that if runoff does enter a sinkhole, a UIC (Underground Injection Control) permit may be required.)
2. Soil and logging debris shall not be concentrated or actively accumulated in a sinkhole.

Recommendations:
Disturbing soil in sinkholes with open swallets should be avoided. However, each case can be evaluated individually. Reestablish vegetation on disturbed areas as quickly as possible. Divert runoff away from openings in sinkholes.
